Version 1.0.RC -> 1.0

Breaking Changes:

- The BPSim root element is now called BPSimData (renamed from ProcessAnalysisData)
- The ElementParameters attribute elementId was renamed elementRef to align to the metamodel. It's type is now xsd:QName to better reflect its use.
- The triangular distribution mostLikely attribute was renamed mode (mathematical term)

Non breaking changes and additions:

- Corrected the DistributionParameter definition order (sequence vs attribute)
- timeUnit and currencyUnit were added to the DistributionParameter type
